

Fall & Winter Blend

Hancock's Fall & Winter Wildlife Seed Blend - Hancock's Fall & Winter Wildlife Seed Blend is designed for low cost winter food plots that provide a variety of high protein legumes. Planted at 50 lbs. an acre in most soil types germination will occur within three to five days. Fertilization is vital for a great food plot. We recommend 200 lbs. per acre of 16-04-08. 400 lbs of lime or dolomite should be applied every two or three years in the food plot. Remember to choose a location with moist soil conditions during the rainy season. Our winter food plot blend is plain and simple, "quality seed with quality results".
